Example Slides

Calculate the attention of subjects

Here we calculate the attention of subjects
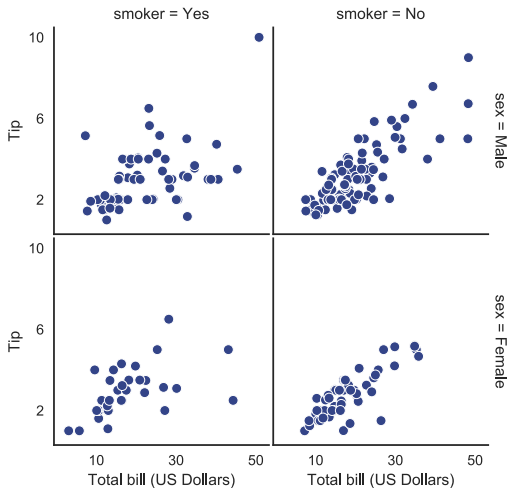

A slide with just text

- First point
- Second point
- Third point

A look at the tips dataset

This is a formula $x = \frac{1}{2}\cos(y)$

Here we show some code

```
g = sns.FacetGrid(tips, col="day", size=4, aspect=.5)
g.map(sns.barplot, "sex", "total_bill");
```
